

Área

$$A = \text{Base} \times \text{Altura}$$

$$A = \text{Lado} \times \text{Lado}$$

$$A = \frac{\text{Base} \times \text{Altura}}{2}$$

$$A = \text{Base} \times \text{Altura}$$

$$A = (\pi)(\text{Radio})^2$$

$\pi = 3.1416$

$$A = \frac{\text{Perímetro} \times \text{Apotema}}{2}$$

Para cualquier polígono regular

$$A = \frac{(\text{Base Mayor} + \text{Base Menor}) \times \text{Altura}}{2}$$

$$A = \frac{\text{Diagonal Mayor} \times \text{Diagonal Menor}}{2}$$
